so

+ Recognize the "Keywords" defined at section "Settings" section. If the string is exists it will extract the keyword, and add as a html code into the wiki page. + Recognize the "Special Charaters" defined at section "Settings" section. If the string is exists it will add them to the wiki page as html codes. + Recognize HTML codes in between the wiki tags. + Export a page to MediaWiki format. You can select to export only a certain parts of page. For example, if you want to export only "Content" section, use

this code. `$text_[$node->getProperty("text")]->setAttribute("class","text");` +

Export a page into a folder that you want to save. You can use this folder to import the page again. + You can use

MediaWiki markup language (`$node->getProperty("param")` format) to define the special characters.

MediaWiki - Wiki page is a free, open source, wiki software created by the MediaWiki community. It can be used to create easy-to-use, online, collaborative websites. Unlike most wiki software, this one is written

entirely in PHP. In addition, it has a simple API for wiki embedding and a number of easy plugins. CKFinder - is an extremely fast and efficient full-featured file manager. It can be used both as a stand-alone application and as an explorer replacement in web browsers. It supports drag-and-drop, navigation by directory, security and sharing. CKFinder runs on Windows NT/2000/XP/Vista, Linux and Mac OS X platforms. It supports Unicode.

KMPlayer - is a light weight cross platform player, which will run either

embedded in a web page or as stand alone application. It features built in GUI, remote control, subtitles, playlist, frame rate conversion and many other useful features. The source code is fully licensed under GPL. XeroTalk-XeroTalk is the online software designed for your small business to connect, communicate and collaborate. In this product, you will find everything you need to run a successful e-commerce business. It enables you to communicate with your customers and business partners in real time. It empowers you

to run a rewarding online business. You can import products to sell, track your sales and easily manage customer relationships. Its easy to use.

YouWrangler - YouWrang 77a5ca646e
